alison prentice's 1977 groundbreaking monograph *The School Promoters* is a revisionist account of public education's emergence. This latest edition includes a foreword and appendices by editors Bruce Curtis, Jennifer Henderson, and Mythili Rajiva, offering updated analysis and primary documents that deepen the understanding of Egerton Ryerson's role in shaping Ontario's educational system. Using a wide range of archival and published sources, *The School Promoters* provides a lucid account of the preoccupations of the white, mostly middle-class reformers connected to Ryerson who were responsible for the advent of public education in Ontario as part of their concern with the future of Canadian society. This edition situates Prentice's analysis of class domination within the context of settler colonialism, exploring how education worked as a project for genocide as well as a means of social discipline. In particular, the editors expose how the proclaimed universality of public education was contradicted by the reformers' logic for targeting paupers and Indigenous peoples with religious schooling. A reparative reading of Prentice's influential work, *The School Promoters: Egerton Ryerson and His Circle*, second edition, highlights the relevance of this groundbreaking social history to contemporary analysis of Canada.

Brain imaging brings together the technology, methodology, research questions, and approaches of a wide range of scientific fields, including physics, statistics, computer science, neuroscience, biology, and engineering. Thus, methodological and technological advances that enable us to obtain measurements, examine relationships across observations, and link these data to neuroscientific hypotheses happen in a highly interdisciplinary environment. The dynamic field of machine learning, with its modern approach to data mining, provides many relevant approaches for neuroscience and enables the exploration of open questions. This state-of-the-art survey offers a collection of papers from the workshop on machine learning and interpretation in neuroimaging (MLINI 2011) held at the 25th annual conference on neural information processing (NIPS 2011) in the Sierra Nevada, Spain, in December 2011. Additionally, invited speakers agreed to contribute reviews on various aspects of the field, adding breadth and perspective to the volume. The 32 revised papers were carefully selected from 48 submissions at the interface between machine learning and neuroimaging. The papers aim at shedding some light on the state of the art in this interdisciplinary field. They are organized in topical sections on coding and decoding, neuroscience dynamics, connectivity, and probabilistic models and machine learning.

in schools serving high concentrations of bilingual learners it can be especially challenging for teachers to maintain commitments to equity minded instruction while meeting the demands of new educational policies including national standards this book details how one school integrated equity pedagogy into a standards based curriculum and produced exemplary levels of achievement as the authors illustrate however the school s dual commitment to bilingual education and standards based reform engendered numerous complex tensions specifically the authors describe teachers attempts to balance demands for rigor and content coverage within their high performing school and with their diverse student population they identify specific tensions that emerged around the following issues the degree of academic struggle that is generative for student learning and the point at which such struggle becomes counterproductivethe holding of high expectations for all learners and the provision of differentiated student centered learning experiencethe ccss emphasis on engaging students around more complex text and the contested determination of what constitutes complexity in text and in teachingthe influence of high stakes accountability on school norms and practices including teachers interpretations and enactment of new national standardsthe performance pressures placed on teachers in today s educational policy context this book offers welcome guidance on dialogical teaching to socially committed teachers and teacher educators linda valli university of maryland a must read for those interested in transformative teacher learning kris d gutiérrez carol liu professor gse university of california berkeley
